

Units kg/l (liquor ratio) and $\text{Å}^{\circ}\text{C}/\text{min}$ do not appear in the pop up menu of ITM Registry | System settings | Prod unit. Why?

They must be configured as relative units like:

$\text{Å}^{\circ}\text{C}/\text{min}$: $\text{Å}^{\circ}\text{C}$ / min result: empty

kg/l : kg / l result: empty
