

**How do I backup my customer file, if I don't have a floppy drive?**

All versions of Paintmaker, and older versions of Datacolor Paint will default to making a backup of the customer formula file, from a floppy drive. To back up the customer file outside of the Datacolor software, you must copy the file named, CUSTOM.MDB, to another source. The location of this file is in the following folder, depending on your software version:

Paintmaker:

c:\Paintmkrdatacustom.mdb

^

Datacolor Paint

C:\Program Files\datacolor\Spectrum\Datacolor Paint\Datacustom.mdb

*Author: Datacolor*

*Saved From: <http://knowledgebase.datacolor.com/article-579.html>*
