

How do I add the CSI Color Solutions International colorwall into Tools for Search

You will click on the **Search** button on the ribbon bar in Tools. Then on the search page under **sample type** choose **CSIColor Wall**. The option **update CSI library** button will be available. Click it and browse to the proper file on cd or elsewhere. The file name will have the extension .qtx_enc i.e. colorwall.qtx_enc
