

Error: Start_IP.exe - Entry Point Not Found. The procedure entry point @Easysize@initialization\$qqrv could not be located in the dynamic link library ITM_DataAccess.bpl.

The main file of ITMProcess (start_IP.exe) is loading an auxiliary file (ITM_DataAccess.bpl) that is not up to date. Two versions of the same file certainly exist on the computer and the system variable `â€™pathâ€™` points first to the old version.
