

**We cannot delete one auxiliary. It will shown the error message: Delete not allowed! Auxiliaries : ARO-BLN--> 1 Inventory Operations ... We have checked all stock operations but none uses it. I get**

The problem comes form the line in the upper table. It is a stock move that has lost its link to a production. This can be explain by a bug in the program that was fixed after version 1.2.h Do the following to delete this line: Open the Chemical ...
